

## BIOMETRICS BY SERIS

### INNOVATION

**The security of sensitive premises** : Seris Xcess assures secure access to confidential zones and is particularly recommended for use in internal zones such as managerial offices, IT rooms (servers), storage areas, meeting rooms, etc.

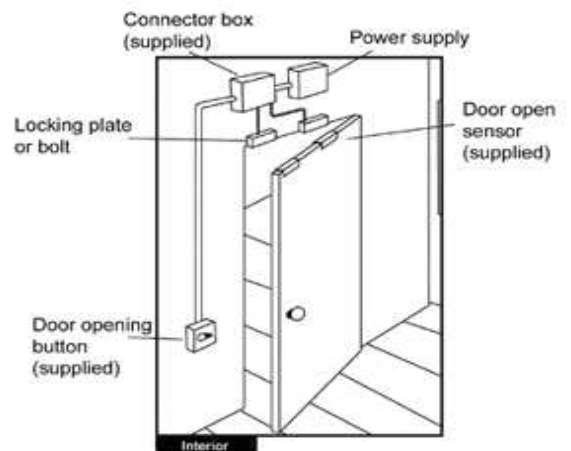

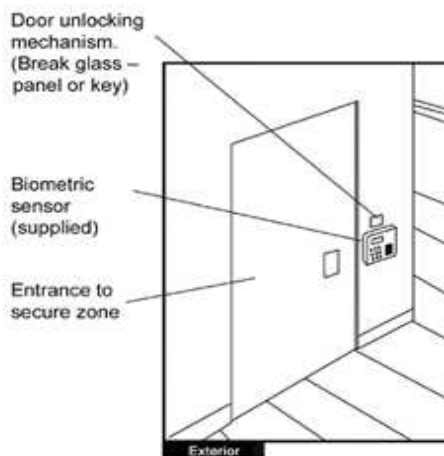

**Simple to use** : Using a fingerprint recognition system, Seris Xcess can grant or refuse access to sensitive areas. Its simplicity is perfect for introducing biometric security to your business.

**Easy to install** : Fix it to the wall, plug in the accessories, plug it in and it's ready to go! Seris Excess has been designed for ease of installation: with its remote connector box for ease of fitting.

### THE PRODUCT

**Software:**  
**Seris Xcess Version STA 3.0**

**SPECIFICATIONS**

<b>Seris Xcess</b>	
Reader dimensions	Length 146mm Heigh 135mm Depth 43mm
Power Supply	DC 12V / 1A
Biometrics sensor	SAGEM Morpho Minutiae Algorithm One to many search capability (up to 99 user) Configurable False Acceptance Rate (FAR) +/- 15 kV ESD withstanability 500DPI image resolution More than 1 M touch
Contact and contactless smart card module (optional)	ISO – 14443 type A ISO – 14443 type B ISO – 15693 Mifare Classic Protocol I.CODE 1 protocol (Philips)
